Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2, drawn to a semiconductor laser, classified in class 372 subclass 36.
 - II. Claim 3-5, drawn to a gas discharge laser, classified in class 372, subclass 36.
 - III. Claim 6, drawn to a method of operating a gas discharge excimer laser, classified in class 372, subclass 36.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention has separate utility such as T/W, the relationship among the melting points of said solder layer A, B, C, and stress working in said semiconductor laser element. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the fields of search are not co-extensive. Therefore, separate examination would be required and restriction for examination purposes as indicated is proper.
